

Management Criteria for Regulated Chemicals

Version 4.9, February 2023

OMRON Corporation

Device and Module Solutions Company

1. Purpose

This document specifies the scope covered by “*Certificate of Non-inclusion for Prohibited Substances in Products*” (hereinafter, “Certificate of Non-inclusion”) issued by Device and Module Solutions Company of OMRON (hereinafter, “OMRON”).

2. Scope

This document applies to OMRON products certified and covered by Certificate of Non-inclusion issued by OMRON.

This document is intended for products at the time of shipment, excluding products processed or contaminated after the shipment or during distribution.

3. Restrictions

3.1. Regulated Substances

- (1) Attachment 2, “*List of Regulated Chemical Substances*,” lists prohibited chemicals rated as Rank-A
- (2) Attachment 3, “*List of Exempted Applications*,” lists exempted uses of the prohibited chemicals
- (3) Attachment 4, “*Illustrated List of Regulated Chemical Substances*,” lists substance groups as examples for Attachment 1 stated as Item (1) above.

3.2. Designation of Regulated Chemicals

Based on IEC62474 for electrical and electronic components, regulated chemical substances are designated and rated on chemSHERPA.

Rank A (prohibited substances/applications)

Substances whose content is already banned by laws and regulations, or substances/applications designated as banned to use by OMRON originally.

Relative laws and regulations are listed in Attachment 2, “*List of Regulated Chemical Substances*.”

*For chemical substances whose specific uses are subject to control under this document, our Certificate of Non-inclusion does not cover such specific uses.

OMRON conducts testing for regulated chemicals based on the precondition that OMRON products are not intended for such specific uses.

Our “Certificate of Non-inclusion” does not cover substances for exempted applications specified by RoHS Directives or other environmental regulations that are effective at the time of issuing the certificate.

Attachment 1. Terms and Definitions

1. Regulated chemicals /Regulated chemical substances

Chemical substances whose use for or in products is prohibited or restricted, or whose contents shall be identified by laws and regulations in countries, or chemical substances whose contents and usage are identified and restricted by OMRON voluntarily due to their hazardous properties.

2. Contain a chemical or use of a chemical

When the content of a chemical substance in a Part or material exceeds the level specified by the content determination criterion, it is determined that the chemical is contained in the Part or material. The decision is made also based on whether or not the chemical is intentionally used, whether or not its concentration exceeds threshold values, or whether or not its use is restricted.

Refer to Attachment 2, "*List of Restricted Chemical Substances*" and Attachment 3, "*List of Exempted Applications*" for details of the determination process.

3. Non-inclusion

Non-inclusion of a chemical substance means that the content of the chemical substance is less than the threshold value specified by the content determination criteria, including cases where the chemical is not intentionally used, where its concentration is less than threshold concentration values, or where the chemicals is not intended for restricted uses.

Even if a restricted chemical is used in a production process for a product, "non-inclusion" of the chemical can be determined unless the chemical remains in the product.

(For example, when a volatile solvent is used to clean a component, the solvent will not remain with or in the component, and therefore you can determine "non-inclusion" of the chemical substance.)

4. Content determination criteria

The content determination criteria determine whether the content of chemical substances exceeds respectively regulated levels or not. The criteria specify restricted uses and applicable threshold values, based on regulatory requirements, international standards, and other relative regulations.

5. Intentional use

Intentional use of chemicals refers to intentionally adding, filling or applying restricted chemicals for the purpose of continuously sustaining functionality or quality of products, parts or materials.

6. homogeneous material

Homogeneous material means a material of "uniform composition throughout" that cannot be mechanically disjointed or separated into different materials (by mechanical actions such as unscrewing, cutting, crushing, grinding and abrasive processes).

Examples of homogeneous materials include different types of plastics, ceramics, glasses, metals, plating, paper, unpopulated boards, resins, and coating.

7. IEC 62474

IEC 62472, standing for the International Electrotechnical Commission (IEC) 62474 Material Declaration Standard (for the electrical and electronics industry), specifies procedures, formats and other details required for material declarations of products supplied in the electrical and electronics industry. Substances and substance groups satisfying this standard are uploaded to the IEC 62474 database.

8. chemSHERPA

This is a communication scheme used for sharing information of chemicals contained in products throughout the supply chain. The scheme was developed by the Ministry of Economy, Trade and Industry (METI) of Japan, and is maintained and managed by the Joint Article Management Promotion-consortium (JAMP).

Attachment 2. List of Regulated Chemical Substances

The cautions about "Note" used in the list are as follows.

Cautions :

Note 1 The "Judgement criteria" is used to make a judgement on whether the substance is present over the criteria.

The five-digit ID code provided in "ID" column is an ID code defined in IEC 62474 DSL and is also used in the Compliance Information of chemSHERPA.

The "IEC62474DSL" refers to the List of Declarable substance groups and declarable substances," defined in IEC 62474. You can download the list from the following URL.

<http://std.iec.ch/iec62474/iec62474.nsf>

The "Applications" column under "Content criteria": For chemical substances whose specific uses are restricted, OMRON conducts testing based on the precondition that OMRON products are not intended for those specific uses.

Note 2 The "Reporting Level" means the threshold level for concentrations which are calculated by dividing the content of the substance by the weight of the product, homogeneous material, or constituent part containing the substance (denominator for calculating the content rate).

The terms, Part, and Material, indicated in the List mean the following, respectively.

Product = OMRON Part = constituent part, Articles , Material = Homogeneous material

Note 3 The substance without CAS No. assigned is listed with its SG No. or SN No. of chemSHERPA.

Note 4 The substance / substance group has exempted applications. Refer to Attachment 3.

Note 5 As the threshold level is indicated as the content rate of the subject element, the calculation of content rates is based on the subject element's conversion factor shown in the *Illustrative List of Regulated Chemical Substances* (Attachment 4).

Note 6 Although not included in "Compliance" of chemSHERPA, Omron has added the requirement, including applications, threshold values and exempted applications, based on laws and regulations.

Note 7 Heavy metals (cadmium, hexavalent chromium, lead, mercury) in packaging materials, Polyvinyl chloride (PVC), Tris(2-chloroethyl)phosphate (TCEP), Tris(2-chloro-1-methylethyl)phosphate (TCPP), Tris(1,3-dichloro-2-propyl)phosphate (TDCPP) and Mineral oil aromatic hydrocarbons comprising from 1 to 7 aromatic rings (MOAH) are substances that OMRON specifically self-added.

Note 8 The statement, "Prolonged skin contact is evident," means that the subject part or material in contact with the skin will fail the EN 1811 test.

Examples includes the following:

Earrings, necklaces, bracelets, chains, anklets (ankle accessories), rings, watches (watch case, strap, buckle), rivets (buttons, fasteners, zippers), and other metal items to be attached to clothing.

Note 9 The following nine product types are subject to the reporting requirement. Report only when applicable.

[1] Cathode-ray tube equipment, [2] Cathode-ray tube, [3] Computer monitor with cathode-ray tube, [4] Cathode-ray tube television, [5] Laptop computer with liquid crystal display, [6] Desktop liquid crystal display, [7] Liquid crystal display screen television, [8] Portable DVD player with liquid crystal display screen, [9] Plasma television

Note 10 Packaging materials refer to materials used for transportation, buffering, and storage of OMRON products. All materials such as paper and plastic are eligible. Specifically, product exterior boxes, bags, cushioning materials, and labels attached to them are applicable.

A: Prohibited substances/applications (53 substances)

No	CAS No/ Substance group ID Note 3	Substance/Substance group	Management Classification	Judgement criteria Note 1		Threshold (Reporting threshld / Reporting Level Note 2)	Referenced laws & regulations

Attachment 3. Exempted Application List

The cautions about "Note" used in the list are as follows.

Cautions :

Note 1 "Industrial displays" are electronic displays designed only for use in industrial environments, and at a minimum must satisfy all the following (a) to (d).

(a) Operation must be possible at 0 to 50°C, (b) there must be no condensation at 20 to 90% humidity, (c) at least IP65 must be satisfied, and (d) must satisfy EMC immunity in an industrial environment

CAS No/ Substance group ID	Substance/Substance group	Content criteria_ID	Applications (Reportable applications)	Usage code		Description
				Laws & regulations	Code	
SG006	Cadmium/Cadmium compounds	00010	All, except batteries	RoHS	13(b)-(II)	Cadmium in striking optical filter glass types; excluding applications falling under point 39 of this Annex
				RoHS	13(b)-(III)	Cadmium and lead in glazes used for reflectance standards
SG010	Diocetyl tin (DOT) compounds	00015	(a) textile and leather articles intended to come into contact with the skin, (b) childcare articles, (c) two-component room temperature vulcanisation moulding kits (RTV-2 moulding kits)	REACH Annex XVII	DOT-1	Any articles other than the following articles- textile articles intended to come into contact with the skin,- gloves,- footwear or part of footwear intended to come into contact with the skin,- walls and floor coverings,- childcare articles,- female hygiene products,- nappies,- two-component room temperature vulcanization molding kits (RTV-2 molding kits)
SG014	Lead/Lead Compounds	00021	All, except batteries	RoHS	6(a)-I	Lead as an alloying element in steel for machining purposes containing up to 0.35% lead by weight and in batch hot dip galvanised steel components containing up to 0.2% lead by weight
				RoHS	6(b)-I	Lead as an alloying element in aluminium containing up to 0,4 % lead by weight, provided it stems from lead-bearing aluminium scrap recycling
				RoHS	6(b)-II	Lead as an alloying element in aluminium for machining purposes with a lead content up to 0,4 wt%
				RoHS	6(c)	Copper alloy containing up to 4 % lead by weight
				RoHS	7(a)	Lead in high melting temperature type solders (i.e. lead-based alloys containing 85 wt% or more lead)
				RoHS	7(c)-I	Electrical and electronic components containing lead in a glass or ceramic other than dielectric ceramic in capacitors, e.g. piezoelectronic devices, or in a glass or ceramic matrix compound
				RoHS	7(c)-II	Lead in dielectric ceramic in capacitors for a rated voltage of 125 V AC or 250 V DC or higher
				RoHS	13(a)	Lead in white glasses used for optical applications
				RoHS	13(b)-(I)	Lead in ion coloured optical filter glass types
				RoHS	13(b)-(III)	Cadmium and lead in glazes used for reflectance standards

Attachment 4. List of Reference Substances

The cautions about "Note" used in the list are as follows.

Cautions :

Note 1 The substance without CAS No. assigned is listed with its SG No. or SN No. of chemSHERPA.

Note 2 The "IEC62474RSL ID" provided in the Illustrative List of Regulated Chemical Substances is ID codes defined in IEC62474RSL.

"IEC62474RSL" is a list of reference substances defined in IEC62474.

You can download the list from the website of the following URL.

<http://std.iec.ch/iec62474/iec62474.nsf>
